

LIFEPAK® CR2 Defibrillator

with LIFELINKcentral™ AED Program Manager

Upgrade to the new standard in public access defibrillation.

Sudden cardiac arrest (SCA) can happen to anyone—anywhere. That's why public access defibrillators are so important. They put lifesaving technology where it can do the most good. So when an emergency happens, you should have nothing less than the best.

Simple, intuitive operation

For a minimally trained responder, intervening in an emergency can be intimidating. Responders need the easiest possible AED to instill confidence. While other AEDs may be difficult to use, the LIFEPAK CR2 Defibrillator offers a layered design with bold, easy to follow graphics and detailed audible instructions to help users remain focused. We've removed all the guesswork.

Both trained and untrained AED users can quickly begin lifesaving care in just 2 steps:

- Fastest time to first shock¹
- Rated easiest to use and higher in overall user confidence by AED users¹
- Metronome and CPR coaching for depth and rate
- 4-year battery and
- 8-year warranty
- Simplified AED program management to ensure readiness

1
Open lid and bare patient's chest.

2
Pull red handle and apply electrodes.

Advanced lifesaving technology

QUIK-STEP™ electrodes

Peel directly off the base for faster side-by-side placement.

Highest available escalating energy

Up to 360J for more effective shocks as needed.

Metronome and CPR coaching

Audibly guides users in performing effective compression depth and rate.

Bilingual

Toggle between two pre-set languages when using the device (optional).

ClearVoice™ technology

Detects background noise and adjusts volume for clear instruction.

LIFEPAK TOUGH™

IP55 rating for challenging environments.

8-year warranty

Backed by an 8-year warranty.

Let's save more lives.

To find out more about upgrading your AEDs to a LIFEPAK AED Response System, please contact your local Physio-Control representative or visit our website at www.physio-control.com

Is it time to upgrade your AEDs?

Your automated external defibrillator (AED) is one of the most important safety tools to have ready for your employees, customers, students and the public. As equipment matures, it is important to evaluate your AEDs to determine if it is time for replacement.

Replacement checklist

- Has the warranty expired?
- Does the AED use outdated monophasic technology?
- Are accessories and disposables no longer readily available?
- Are the instructions simple enough for lay responders?
- Does the AED lack CPR coaching and feedback?
- Can the device be safely used on children and adults?
- Is your maintenance program as efficient as you would like?

One (or more) of these reasons is enough to consider upgrading your AEDs to the LIFEPAK CR2 AED Response System.

Age of device

To save a life, you want your device to be in the best condition. In AEDs, batteries and internal components age and lose effectiveness over time. This aging effect occurs even with AEDs that have never been used. The length of the warranty is a good guide to expected peak performance. Once an AED has an expired warranty, it's wise to consider replacing it.

Cost of ownership

If your warranty is expired, it can become cost-prohibitive to service your AED. Check for any take-back or trade-in discounts that can help offset the cost of replacement. When it's time to replace your AEDs, ask about the warranty period of your new devices. Physio-Control now offers an eight-year warranty on the new LIFEPAK CR2 Defibrillator—one of the longest warranties on the market today.

¹ Physio-Control Internal Semi-automatic AED Comparison Usability Study, August 2016.

All claims valid as of August 2016.

If you purchased your LIFEPAK CR2 Defibrillator from an authorized Physio-Control distributor or reseller, this distributor or reseller will have access to your LIFELINKcentral AED Program Manager account and may receive notifications prompted by the LIFEPAK CR2 Defibrillator. Please note that this setting can be disabled at ANY time; if you wish to disable this setting, please send a request to Physio-Control Customer Support to change the Distributor value to "Customer Managed".

Physio-Control is now part of Stryker
